About the Marina

A number of enthusiastic people founded in 1970 our Marina "Otterup Lystbaadehavn" normally called EGENSEDYBET. Due to an extraordinary effort from a large number of people the basin was dug out and built over period of just two years after several years spent obtaining the necessary permissions as the area borders designated nature reserves. Now we can enjoy the benefit of this enormous effort, which has given us the foundation to enjoy a good social life with many interesting events throughout the summer. The Marina is in the private ownership of 79 shareholders and has just finished a renovation during 2013 with new jetties being added in 2016. A number of visiting sailors from far and near visit our Marina during the summer each year and thus helps bringing extra life to our Marina.

All visitors are always heartily

Welcome
